Heavy Duty Below Grade, Blind-Side, Under-Slab Waterproofing Membrane Approved for Shot-Crete

Section 071000 / 071300 / 071353 / 071354 Sheet Applied Waterproofing

#### **Product Name**

Aussie Skin® 550

# **AVM System No.**

AVM System 550

#### By

AVM Industries, Inc. 8245 Remmet Ave, Canoga Park, CA 91304 888.414.1041 818.888.0050 www.avmindustries.com

#### **Product Description**

AVM Aussie Skin 550 is a Heavy, Duty, Easy to Install, Puncture Resistant Sheet Waterproofing Membrane with added technologies creating excellent adhesion between the membrane and wet Concrete or Shot-Crete. Once the Concrete or Shot-Crete is cured, the membrane will become fully bonded to the concrete surfaces eliminating any potential migration of water between itself and the concrete surfaces to which it is bonded.

## Where to Use

Retaining Walls, Basements, Under-Slabs, Mud-Slabs, Tunnels, etc.:

**AVM Aussie Skin 550** may be applied either horizontally to smoothly prepared concrete substrates and/or compacted earth or crushed stone substrates. May also be applied vertically to permanent formwork such as lagging. Concrete is then cast directly against the adhesive side of the membrane.

Note: **AVM Aussie Skin 550** is not suited to waterproof roofs or other internal wet areas.

#### **Application Method:**

Pre-Applied, loosely laid.

#### Warranty

AVM Industries provides a standard five (5) year warranty. Ten (10) year warranties are also available. For complete warranty details, contact AVM Industries or consult with your applicator. Shot-Crete to conform to ACI 506 standards.

#### **Delivery, Storage, and Handling**

- Delivery of all the AVM Aussie Skin 550 materials to the job site must be in their original sealed containers, with manufacturer's name and label intact.
- Handle and store containers in accordance with printed instructions.
- c. Shelf Life: One year from date of manufacture.
- d. Store at temperatures between 50°F and 90°F. Do not store materials in direct sunlight or where they may be damaged by water or rain.
- e. Failure to comply with the recommended storage conditions may result in premature deterioration of the product.
- f. Keep all materials out of the reach of
- g. If irritation occurs during use, liberally flush affected areas with water. If irritation continues, see a physician immediately.

#### **Project Conditions**

- All surfaces to which the Aussie Skin 550
  is applied must be sound and stable,
  with an even finish and free from sharp
  protruding items, dust, loose debris,
  grease, curing agents, or anything else
  that might damage or prevent the proper
  installation of the membrane.
- 2. The Aussie Skin may be applied at temperatures as low as 20°F and as high as 110°F. For applications at temperatures between 20°F to 40°F, follow the cold weather installation procedures.
- 3. Do NOT install the Aussie Skin if raining or precipitation is imminent. Do not proceed with installing any Aussie Skin components or bonding any seams, laps, etc, if the Aussie Skin surfaces are damp or wet. All surfaces must be completely dry to ensure proper bonding!
- 4. Warn personnel against hazards or hazardous conditions on the job that might require special protective gear and or any other special protective or safety procedures.
- 5. Protect adjacent surfaces which could be damaged during the application procedure.

6. This system must not be used to cover Expansion Joints.

#### **System Application**

Read the **AVM Aussie Skin 550** Training Manual/Installation Instructions Prior to Installation. Application instructions vary based on application surfaces, job conditions, temperatures, etc.

# **Quality Control**

- Visually inspect all coated surfaces to ensure a full and proper application, especially at seams, corners, drainage footings, penetrations and other hard-toreach areas.
- b. All unsatisfactory areas shall be repaired prior to final acceptance.

#### **Protection of Installed Work**

- a. The membrane shall be protected until concrete is properly poured over it.
- b. Do not leave the membrane exposed for more than 60 days.
- c. Always protect the waterproofing from possible damage. If membrane becomes damaged, contact waterproofing installer or AVM before proceeding with pouring concrete.
- d. Once the Aussie Skin is installed (The seams have been bonded together), the Aussie Skin (including the seams) may be immediately exposed to both rain or water. Aussie Sealant must be fully cured before it's exposed to rain or water.

## **Availability and Cost**

Contact AVM Industries or your approved applicator for pricing and availability.

#### **Technical Services**

Technical services are available by contacting our offices at: **888.414.1041** or **818.888.0050** or visit **www.avmindustries.com** 

#### **System Specifications**

See next page.

# The following coverages are based on controlled tests. Actual coverages may vary.

| Item/Component                         | Packaging                     | Approximate Shipping Weights | <b>Qty per Pallet</b> | voc |
|--|-------------------------------|------------------------------|-----------------------|-----|
| Aussie Skin® 550 Membrane 1M (75 Mils) | 3.28'x65.6' Roll (215 sq.ft.) | 74.8 lbs. (34 KG) / Roll     | 25 Rolls/Pallet       | N/A |
| Aussie Skin® 550 Membrane 2M (75 Mils) | 6.56'x65.6' Roll (430 sq.ft.) | 149.6 lbs. (68 KG) / Roll    |                       | N/A |
| Aussie Skin® Detail Strip              | 7.75"x65.6' Roll              | 11 Lbs / Roll                |                       | N/A |
| Aussie Skin® Double Sided Tape 4"      | 4"x33' Roll                   | 2.2 Lbs / Roll               |                       | N/A |
| Aussie Skin® Fabric Tape 4"            | 3.9"x49' Roll                 | 2.4 Lbs / Roll               |                       | N/A |
| Aussie Skin® Sanded Tape 4"            | 3.9"x65.6' Roll               | 6 Lbs / Roll                 |                       | N/A |

| LO21 Waterproofing Test Results               | Test Results  | Test Requirements                         | Test Method     |
|---|---|---|-----------------|
| Puncture Resistance                           | 159 Lbs   | Min 40 Lbs                                | ASTM E154       |
| Hydrostatic Pressure Resistance               | 192 PSI   | As Tested                                 | ASTM D751       |
| Adhesion to Concrete and Masonry              | 30.4 Pounds   | Min 5 Pounds                              | ASTM D903       |
| Tension & Elongation: Machine Direction       | 1061 %  | Min 250%                                  | ASTM D412       |
| Tension & Elongation: Cross Machine Direction | 1050 %  | Min 250%                                  | ASTM D412       |
| Accelerated Aging                             | No considerable reduction in Tension and Elongation of Aged Specimens | Pass. No considerable reduction in either | ASTM G23 & G153 |
| Resistance to Decay (Weight Loss)             | 0.8%  | Max 10%                                   | ASTM E154       |
| Resistance to Decay (Permeance Loss)          | 0%  | Max 10%                                   | ASTM E154       |
| Water Vapor Transmission                      | 0.016 Perms   | Max 0.1 Perms                             | ASTM E96        |
| Water Vapor Transmission after Decay          | 0.016 Perms   | Max 0.1 Perms                             | ASTM E96        |
| Low temperature flexibility                   | Unaffected at -29°C   | Not Listed                                | ASTM D1970      |
| Shear strength of joints                      | 14.5 (N/mm)   | Not Listed                                | ASTM D1876      |

| Shot-Crete Test Results   | Test Method       | Results | Requirements                               |  |
|---|-------------------|---------|--|--|
| Installation over Plywood or directly on the Lagging  |                   |         |  |  |
| Waterproof Integrity of Side (factory) Lap, overlap installed over 2" plywood joint with nails in laps  | ASTM D 5385       | Pass    |  |  |
| Waterproof Integrity of End (non-factory) Lap, overlap installed over 2" plywood joint  | ASTM D 5385       | Pass    | detected up to 100 PSI                     |  |
| Waterproof Integrity of Side (factory) Lap, overlap installed over 2" plywood joint without nails in laps   | ASTM D 5385       | Pass    |  |  |
| Puncture Integrity at Screw Protrusion, Membrane installed over 1/4" protruding #8 bugle head wood screw  | Visual Inspection | Pass    | No visual detection of puncture            |  |
| Installation over Lagging 0.5" EPS Insulation Board (Foam)  |                   |         |  |  |
| Waterproof Integrity of Side (factory) Lap, overlap installed over EPS Foam Board located over 2" lagging joint with nails in laps                                      | ASTM D 5385       | Pass    |  |  |
| Waterproof Integrity of End (non-factory) Lap, overlap installed over EPS Foam Board located over 2" lagging joint  | ASTM D 5385       | Pass    | No water leakage<br>detected up to 100 PSI |  |
| $Waterproof\ Integrity\ of\ Side\ (non-factory)\ Lap,\ overlap\ installed\ over\ EPS\ Foam\ Board\ located\ over\ 2"\ lagging\ joint;\ Joint\ without\ nails\ in\ laps$ | ASTM D 5385       | Pass    |  |  |
| Puncture Integrity at Nail Protrusion Membrane installed over 1/4" protruding nail with 7/32" dia. head   | Visual Inspection | Pass    | No visual detection of puncture            |  |
| Installation over Drain Board   |                   |         |  |  |
| Waterproof Integrity of Side (factory) Lap, overlap installed over Drain Board located over 2" lagging joint with nails in laps   | ASTM D 5385       | Pass    |  |  |
| Waterproof Integrity of End (non-factory) Lap, overlap installed over Drain Board located over 2" lagging joint   | ASTM D 5385       | Pass    | No water leakage<br>detected up to 100 PSI |  |
| Waterproof Integrity of Side (non-factory) Lap, overlap installed over Drain Board located over 2" lagging joint; Joint without nails in laps                           | ASTM D 5385       | Pass    |  |  |
| Puncture Integrity at Nail Protrusion Membrane installed over 1/4" protruding nail with 7/32" dia. head   | Visual Inspection | Pass    | No visual detection of puncture            |  |

Note: "Test Requirements" as listed in Los Angeles City Test Protocol L021, Acceptance Criteria for Below-Grade Exterior Damp-Proofing and Waterproofing Materials dated May 2004 And Los Angeles City Shot-Crete Test Protocol dated April 26, 2016.
