

# Pre-Installation Conference Guide Deck and Planter System Material & Labor Warranty

## System Material & Labor Warranty Requirements

1. AVM product warranty eligibility  
(reference Product Manuals for product applications and installation instructions):
2. Installer: AVM products must be installed by a certified AVM Approved Applicator
3. Project waterproofing details must be installed in accordance with AVM's standard published and/or project specific waterproofing details. Job specific details created by AVM Approved Applicator or designer must be signed off by AVM Representative
4. Pre-Installation Conference: A pre-installation conference shall be held prior to commencement of field operations to establish procedures to maintain optimum working conditions and to coordinate this work with related and adjacent work. Agenda for meeting shall include review of special details and flashing.
5. Inspection: Project must be inspected by Approved Applicator (requirements in warranty section)
6. Leak Detection: Either 48 hour flood testing or electronic leak detection are required. Additional requirements may be needed for electronic leak detection depending on the application
7. Warranty Issuance:
  - The Certified Date of Substantial Completion is required for warranty issuance
  - All substrates must meet AVM requirements and be primed with the appropriate primer
