DETAIL #:
0580-AL-0002
System:
Aussie Mate 580-AL

## Backfilled Wall with Vapor Barrier Under Slab

## **AVM AUSSIE MATE 580-AL**

## Notes:

- 1. Aussie Mate 580-AL is an LARR approved Waterproofing membrane and Methane Barrier.
- 2. Aussie Mate 580-AL is a UV stable, heavy duty bituminous sheet membrane with aluminum protection layer for Below-Grade waterproofing applications and is available in a 60 mil or 80 mil thickness. Aussie Mate 580-AL may also be used as a methane and/or vapor barrier under horizontal slabs on grade.
- 3. All Aussie Mate overlaps must be minimum 2-1/2" See "Lapping Details" for more information
- 4. When installed under slab do not remove integrated poly liner (release liner).
- 5. GPL-16 is required if the substrate is crushed rock or irregular and is not required with a compacted dirt substrate.
